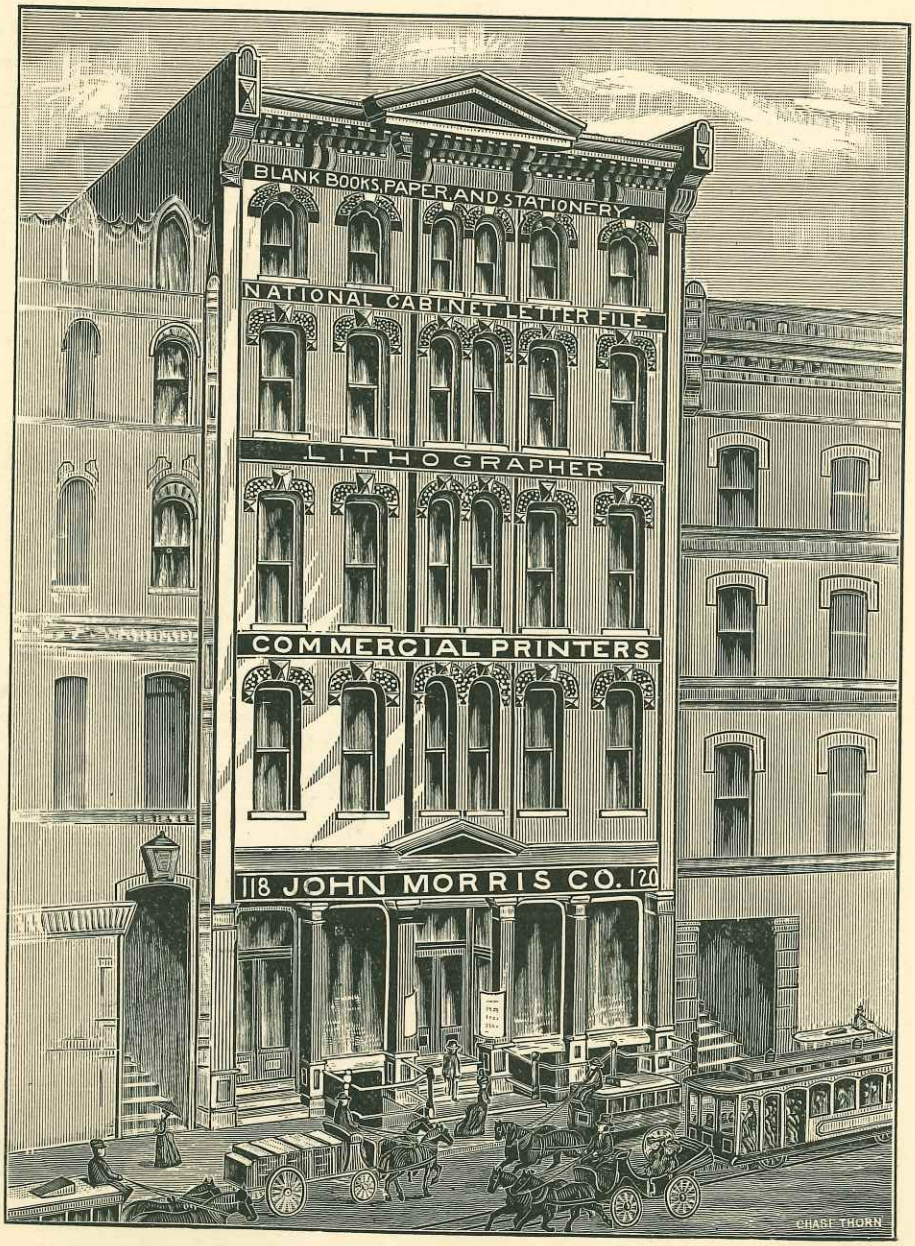
ILLUSTRATED CATALOGUE

IMPROVED NATIONAL

CABINET LETTER FILE.



ESTABLISHED IN 1855.

JOHN MORRIS COMPANY, PRINTERS,
Chicago.

ILLUSTRATED CATALOGUE

OF THE

IMPROVED NATIONAL

CABINET LETTER FILE.

O. C. MACKENZIE'S PATENT.

MANUFACTURED ONLY BY

JOHN MORRIS COMPANY,

Manufacturing Stationers, Lithographers and Printers,

CHICAGO, ILL.

THERE is not a Business House in the United States that would be without a CABINET LETTER FILE, if they could realize and appreciate the advantages and satisfaction derived from its use.

Over 60,000 "Nationals" now in use. Over 3,000 in use by well-known Business Houses that have discarded the most popular of other makes.

To the Public.

IN PRESENTING this fourth addition of our catalogue, we are glad to be able to say that, by years of experience, constant effort, untiring energy, and liberal expenditure, together with many kind suggestions from our patrons, we have succeeded in bringing the National Cabinet Letter File to the very highest degree of perfection.

While at the present time we are unable to see where it would be possible to make any further improvements in the National, we shall by no means relax our efforts in that direction, but will always be on the alert for still further improvement, in order to maintain our present enviable position, far in advance of all competitors. We shall, in the future, as in the past, furnish *the very best* Cabinet Letter File extant.

Respectfully,

JOHN MORRIS COMPANY.

IMPROVEMENTS.

We have recently made several very important improvements in our file, among which we mention:

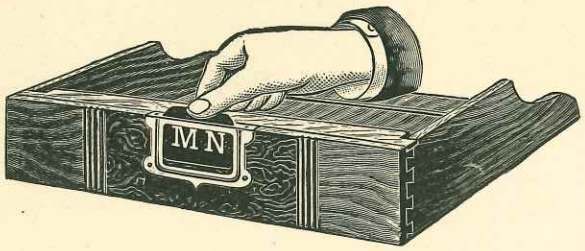
First. The shields for holding the cards on the front of the files are a much neater design than heretofore, and they are so made that the card can be removed or replaced at will. See cut on page 7.

Second. The indexes are bound, as shown in cut on opposite page, so that the sheets cannot fall apart in handling or in transferring from the File to the Receiving Case. The linen tabs have more than double their former strength, as they are now folded at the back.

Third. The Receiving Case is so improved that the indexes are held in the same manner as in the original File (see page 12), thus dispensing with the loose cross-bar and hook, which was often an annoyance by becoming detached from the retaining pin. We also dispense with the frail fixture which formerly held the retaining pin to the bottom of the case.

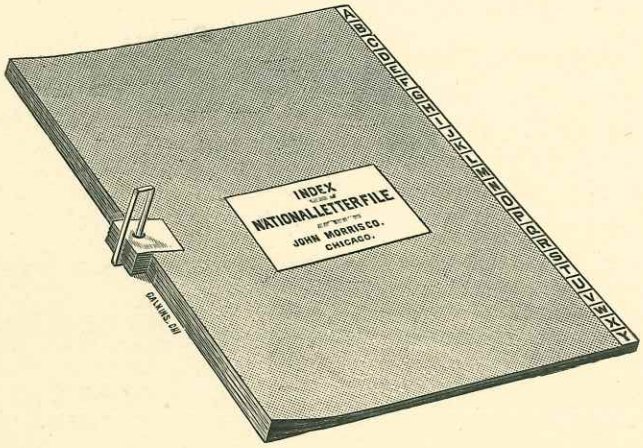
Fourth. Without enlarging the drawer, we have increased its capacity three-fourths of an inch; thus giving the National greater capacity than *any other* Letter File, a fact which is easily demonstrated by actual measurement.

With these improvements we have no hesitancy in saying we have the most perfect, simple, substantial, practical and useful as well as the finest looking Cabinet Letter File ever made.



OUR NEW SHIELD OR CARD HOLDER

Is of very handsome design, and is so made that the cards can be removed or replaced at will.



OUR NEW INDEXES

Are bound so that the sheets cannot fall apart in handling or in transferring from the File to the Receiving Case. The Extension Tabs are made of heavy linen canvas and folded at the back, thus making them the very best and most durable; as, being flexible, they will not break off by repeated bending, as is the case with metal.

"Order is Heaven's First Law."

THE TIME HAS COME

When the Cabinet Letter File is considered as essential to the proper conduct of a well regulated business as the vault or safe, the office desk, or the copying book.

In this age of fast mails, telegraphs, telephones, etc., when competition is pushed to the last extremity, the sagacious business man will readily see that, if he is to stay in the race for success, he must adopt the latest and most improved tools and office fixtures that tend to insure promptness and accuracy in business.

The Cabinet Letter File is not a luxury, but a labor-saving convenience, which no business house can afford to be without, since it is positively established by the testimony of thousands of the best business men in the country—men who have used it—that it is a great saver of time, labor and annoyance. It is a genuine conservator of good humor in any business office, and a boon to those who have a large correspondence.

THE

NATIONAL HAS NO EQUAL.

It is absolutely the most complete and perfect system for filing correspondence of any kind. Many similar systems are offered for sale, some of them possessing great merit, as compared with the old methods of filing letters, but the NATIONAL LETTER FILE eclipses all. It is superior for the following reasons:

It has greater capacity; the spring occupying *no* filing space inside, the Index sheets expand to the full capacity of the file, forming *a solid volume, three and one-quarter inches thick*, and is, consequently, less expensive to run than other system.

Its construction is so simple it cannot get out of order.

It not only works automatically, but the spring bears directly in such a way as to keep the letters or papers straight and smooth, to the full capacity of the file.

There is no turning up of the corners, or tearing out of the leaves of the Index.

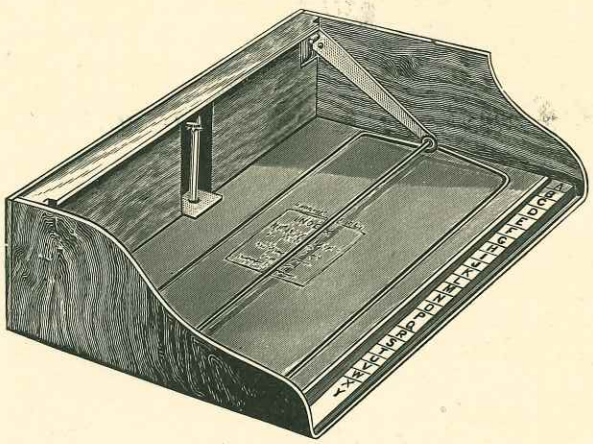
Any letter or paper can be removed and replaced at pleasure, without disturbing the others.

The File can be left open at any place, a simple arrangement of the spring holding the Index in an upright position.

The Receiving Case, for holding the contents of the cabinet files as they become full, is the best ever made, and requires no hammer and nails to complete the transfer, as is the case with other files.

Reference to letters is as complete, reliable and convenient in Receiving or Transfer Case as in the Cabinet.

A FILE REMOVED FROM THE CABINET.

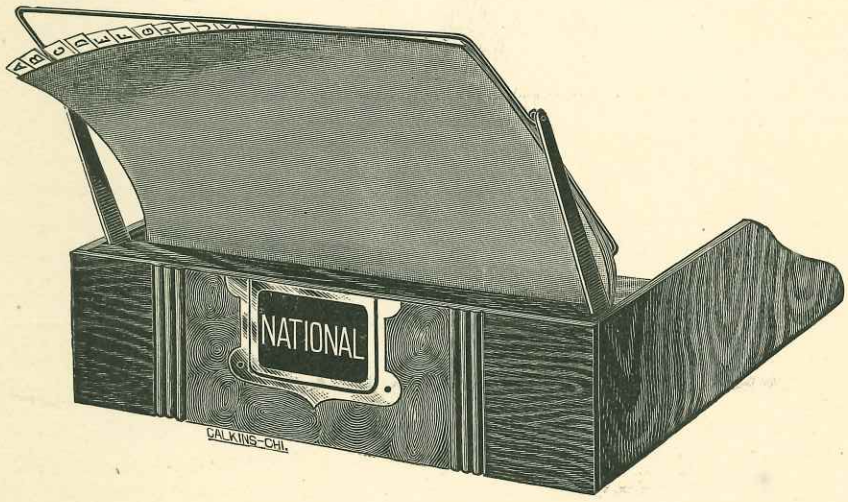


It will be seen by the above cut that there is no obstruction inside to prevent the Index expanding to the full capacity of the file; also, that the clamp device lies flat over the whole surface of the index, whereby the smallest paper or postal card is held securely wherever placed, and the leaves of the Index are prevented from rolling up in front. This clamp, which is a rectangular bail, is hung loosely at either end on a steel bar, the bar being rigidly riveted into the steel arms which extend to the top and back of the file, where, with roller-covered lugs, they work over convex or oval shaped springs. This form of spring automatically increases the pressure on the contents of the File, instead of diminishing, as the File is expanded or thickens up with additional matter, so that when the File is full, the pressure of the clamping device is the greatest at the point most required. When it is required to have access to the File, the right hand should grasp the central bar in the middle, and bring the device to a vertical position, when it forms an efficient back rest for the contents of the File while examining the same.

The Index sheets are held securely in position by a strong iron pin, which is set in a recess in the back of the File and hinged to the bottom. When the Index is in place, it adjusts itself to the contents of the File by sliding up and down on the pin, which is held firm at the top, in a yoke and hook.

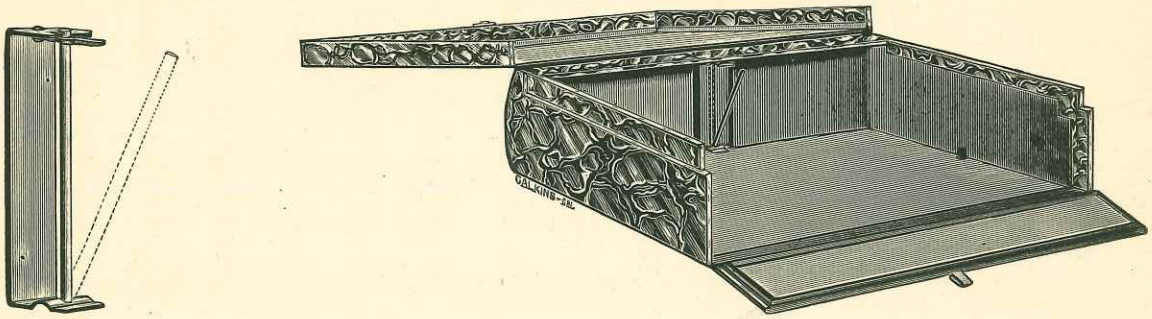
In transferring the contents of a File to the Receiving Case, it is only necessary to throw back the hook and allow the pin to fall forward, when the Index, with its contents, can be lifted out and transferred to the Receiving Case.

No other File can be so easily operated in this particular, and no other Case holds the transferred letters so securely and conveniently as this. After transferring, simply put in another Index and go on using as before.



This cut represents a File left open at any desired place, a great convenience which is often highly appreciated. The Index can be placed in this position instantly, without disturbing the contents of the File in any way, and is as readily closed.

OUR IMPROVED RECEIVING CASE.

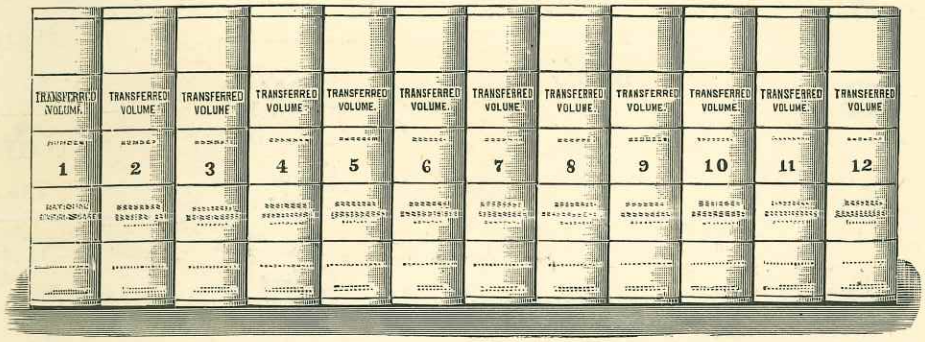


This case does away with the loose cross-bar and holds the index the same as the original file. It is made in imitation of a large book in sheep binding, and is intended to receive the contents of the File when full, the inside dimensions being the same—10 x 12½ x 3¼ inches. There is no annoyance of loose sticks and nails, which are liable to be misplaced or lost when wanted. The case is made of heavy strawboard, with wooden back and front, and is fastened in front with a convenient and substantial brass spring clasp, the only Transfer Case having a positive fastening. This case forms a neat and handy receptacle, sufficiently strong and durable for papers to which occasional reference is made. It is in fact the very best Case ever made for the purpose.

ORDER

NATIONAL RECEIVING CASE, STYLE 18.

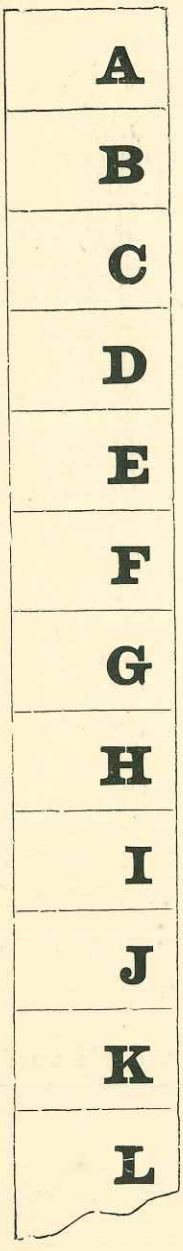
TRANSFERRED VOLUMES.



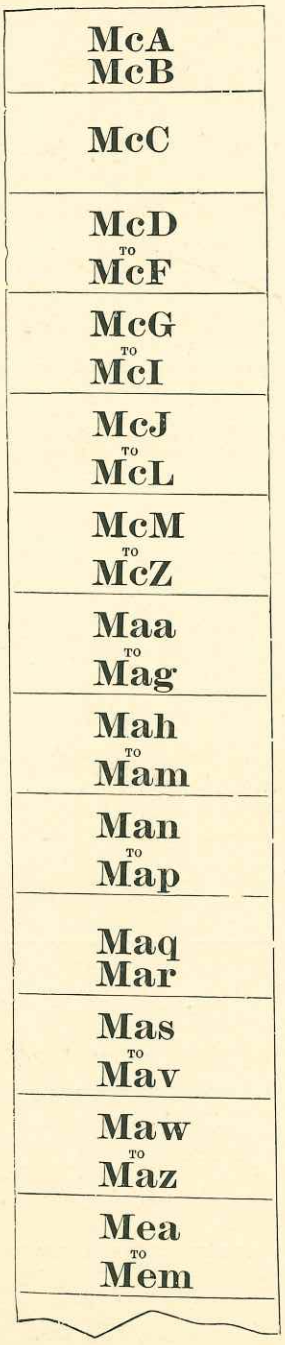
AS THEY APPEAR WHEN FILLED FROM THE CABINET AND SET AWAY.

The above diagram shows twelve Receiving Cases, in the order in which their contents were transferred from a Fifteen-File Cabinet. There should be no attempt to describe the contents of a case by writing or printing on the back. The cases should all be numbered (this we do with stencil, free of charge), and in the bottom of each File will be found a "Record Sheet," properly printed and ruled, on which to keep a record of the number of each Case filled from that file, together with the date of commencing and date of the transfer. This saves the work of lettering the back of the Case, looks much neater and makes it far more convenient to refer to old papers, as, if we want to refer back to letters that have been taken from the B File, we turn to the Record Sheet and find that the contents of Cases Nos. 4, 14, 25, 38, etc., have been transferred from this file. This directs us to the number we want, thereby making a letter received ten years ago as easy to refer to as those which came yesterday. Under no consideration should this record be neglected.

PART OF AN ALPHABETICAL INDEX.

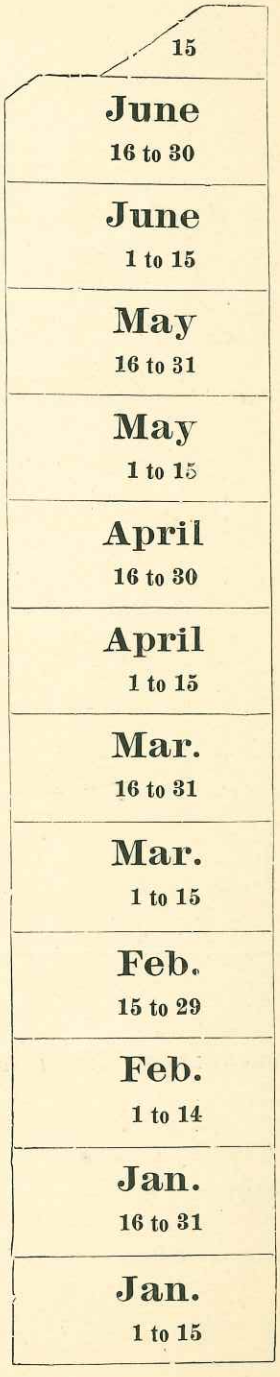


PART OF ABBREVIATION INDEX.



PART OF A MONTHLY INDEX.

PART OF A SEMI-MONTHLY INDEX.



INDEXES.

The Abbreviation or Subdivision Index divides the alphabet into any number of files, from two up, the tabs being printed similar to the head-lines of a directory or encyclopædia, each letter occupying space according to its commercial value as an initial. We have just completed a careful computation of the business names of the country, from which we have revised our Indexes, so that they are much more complete, simple and comprehensive than any others in use.

Nothing is more important in a Cabinet Letter File than to have the indexes plain, simple and properly divided, yet some are still made by other manufac turers that were hastily and imperfectly compiled years ago and long since thrown aside by us as worthless. The National Indexes are so simple that a boy of ordinary intelligence can file letters without any trouble whatever.

Among the numerous Indexes for special files in a Cabinet, we have the Alphabetical, Monthly, Semi-Monthly, Weekly, Daily, Numerical and those having blank margins on which may be written subject matter or the names of special correspondents.

Some of the Different Kinds of Indexes that may be Used for Special Papers in a Cabinet.

DAILY.—Has thirty-one pages, with figures from 1 to 31 on the tabs.

WEEKLY.—This Index has twenty-six pages, with one week on each tab—January to June in one index and June to January in another.

SEMI-MONTHLY.—Has from the first to the middle of the month on the first tab and from the middle to the end on the next one, and so on through the twelve months.

MONTHLY.—Has the names of the months on the tabs and is made for one, two, three or four years.

ALPHABETICAL.—The whole Alphabet in one file.

DOUBLE ALPHABETICAL.—The Alphabet repeated in one file.

ALPHABETICAL AND MONTHLY.—Twelve tabs with the names of the months and the Alphabet complete in the remainder of the Index.

NUMERICAL.—1 to 25 on the first tab, 26 to 50 on the next, and so on to 500.

BLANK INDEX.—Can be made of any number of pages, with blank tabs on which to write the names of special correspondents or subject matter.

How to Order a Cabinet.

Size.—To secure the greatest convenience of a Cabinet, it should contain one-half as many files as you have papers to file each day.

Specials.—The following are some of the special files that might be used: Branch Houses, Commercial Reports, City Bills, Agents, Attorneys, Banks, Paid Bills, Unpaid Bills, Circulars, Bills Lading, Freight Bills, Invoices, Quotations, Receipts, Salesmen, Contracts, Private, etc. After naming as many "specials" as are required, leave a liberal number for general correspondence, into which *we* will divide the Alphabet in proper proportion.

Shape.—State how many files wide and how many high the Cabinet shall be and whether or not doors are wanted.

Wood.—We carry only black walnut Cabinets in stock, but will make to order any wood required. Where the Cabinet has to be made we require from two to three weeks from receipt of order to time of shipment.

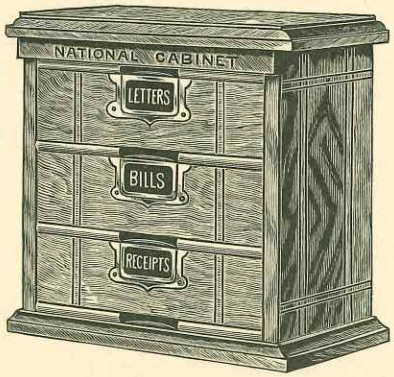
Cabinets for Private Use.

Height, 12½ inches; Length, 15½ inches; Depth, 12 inches.

PRICE, $5.00.

These small Cabinets seem to fill a long felt want, being especially adapted to the use of Officers of Corporations, Heads of Departments, Branch Offices, Retail Merchants, Ladies, for their Household Bills, etc., Clergymen, Physicians, and, in fact, any one having a small correspondence, which they wish to preserve in a tidy and convenient form for reference.

They are not the ordinary cheap Files or Skeletons, but are made of BLACK WALNUT, the same as those used in our large Cabinets. Each File has a complete Alphabetical Index, and will hold from 800 to a 1,000 letters.



Height, 16½ inches; Length, 15½ inches; Depth, 12 inches.

PRICE, $7.50.

Same style, with 4 Files, making the Cabinet 20½ inches high. $10.00.

A door with Yale Lock can be added to either of the above Cabinets for $3.00, or we can put locks on the Files for 75 cents each.

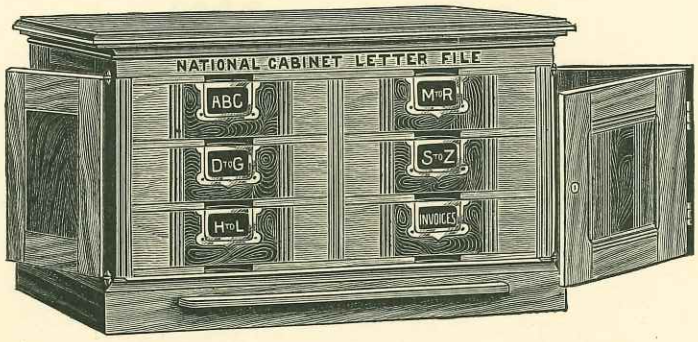
HEIGHT, 28½ INCHES; LENGTH, 15½ INCHES; DEPTH, 12 INCHES.

PRICE, $15.00. WITH DOOR, $18.50.

Where it is desirable to economize in space, this Cabinet is sometimes preferable to one of double width, as shown on opposite page.

SIX FILES.

ONE HUNDRED AND FIFTY COMPARTMENTS.



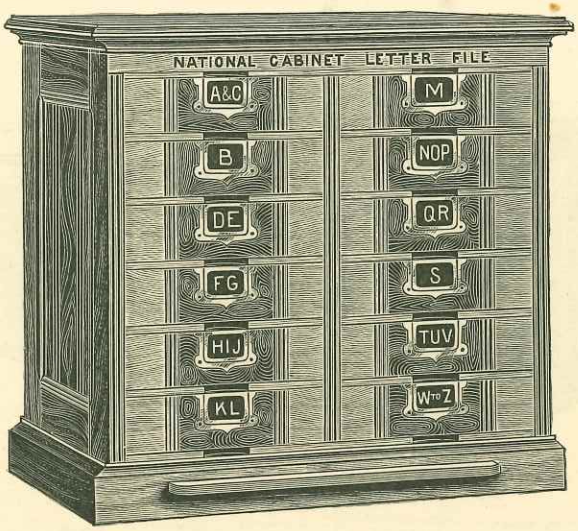
HEIGHT, 1 FOOT 7 INCHES; WIDTH, 2 FEET 6 INCHES; DEPTH, 1 FOOT 2 INCHES.

This size is well adapted for a correspondence of from ten to fifteen letters per day. The above cut represents the alphabet complete in five Files with the Abbreviation Index, leaving one special File, which we have lettered "Invoices." This File would have an Alphabetical Index. If desirable we might have more "Specials," or we might divide the alphabet into six parts and use all the Files for general correspondence.

PRICE ON PAGE 33.

TWELVE FILES.

THREE HUNDRED COMPARTMENTS.



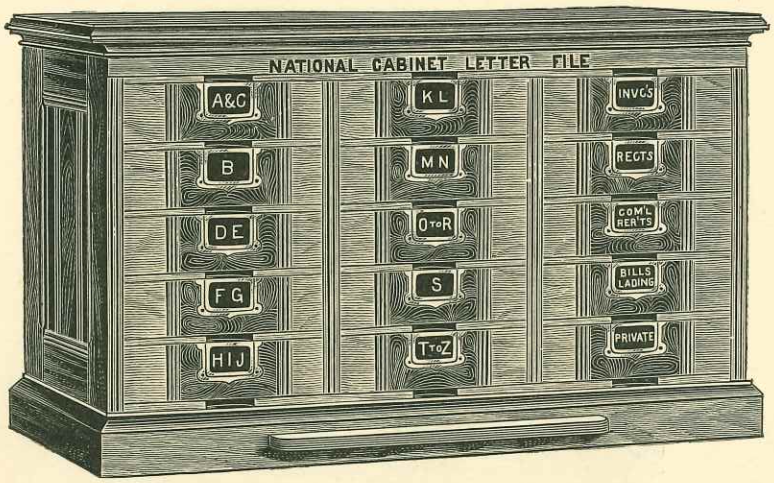
HEIGHT, 2 FEET 7 INCHES; WIDTH, 2 FEET 6 INCHES; DEPTH, 1 FOOT 1 INCH.

The above cut shows all the Files devoted to general correspondence, with the Abbreviation Index. We might, however, use any desired number of "Specials," leaving the alphabet complete in the remainder.

PRICE ON PAGE 33.

FIFTEEN FILES.

THREE HUNDRED AND SEVENTY-FIVE COMPARTMENTS.



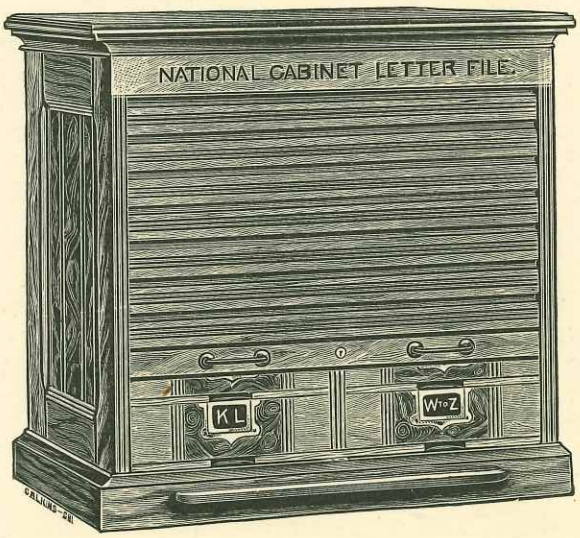
HEIGHT, 2 FEET $3\frac{1}{2}$ INCHES; WIDTH, 3 FEET $7\frac{1}{2}$ INCHES; DEPTH, 1 FOOT 1 INCH.

In the above cut, ten of the Files are devoted to general correspondence, using the Abbreviation Index. Each of the other five would have a complete Alphabetical Index. Any arrangement can be made to suit the purchaser.

PRICE ON PAGE 33.

THE

NATIONAL CABINET LETTER FILE



WITH CURTAIN FRONT.

The above Cut shows a Cabinet with Apron or Cylinder front. We do not consider this front as good as the folding doors, as shown on opposite page, though if for any reason it is preferred by the purchaser, we will furnish the Apron Front (on any size Cabinet) at the same price as doors.

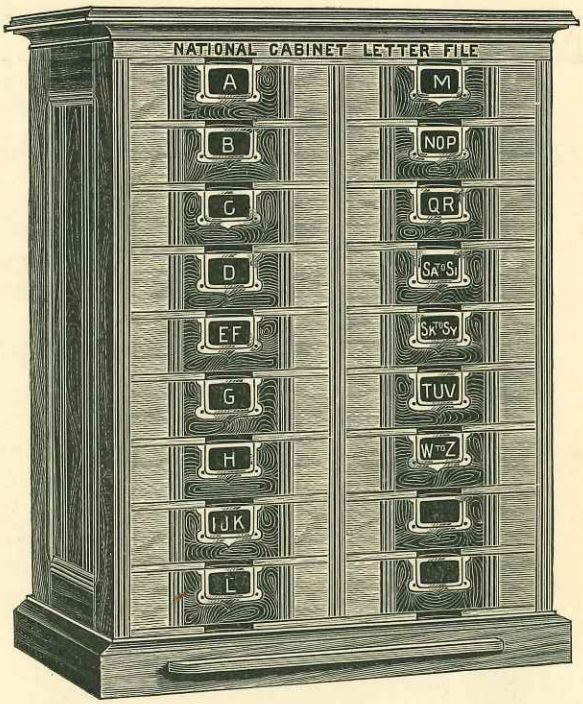
THE

NATIONAL CABINET LETTER FILE.

This cut shows a Cabinet with doors closed and locked. We use a good lock, of the Yale pattern, and furnish two keys with each one. The doors are so made and hung on pin hinges, that, when open, they fold back against the sides of the Cabinet, and are entirely out of the way.

EIGHTEEN FILES.

FOUR HUNDRED AND FIFTY COMPARTMENTS.



HEIGHT, 3 FEET 8 INCHES; WIDTH, 2 FEET 6 INCHES; DEPTH, 1 FOOT 1 INCH.

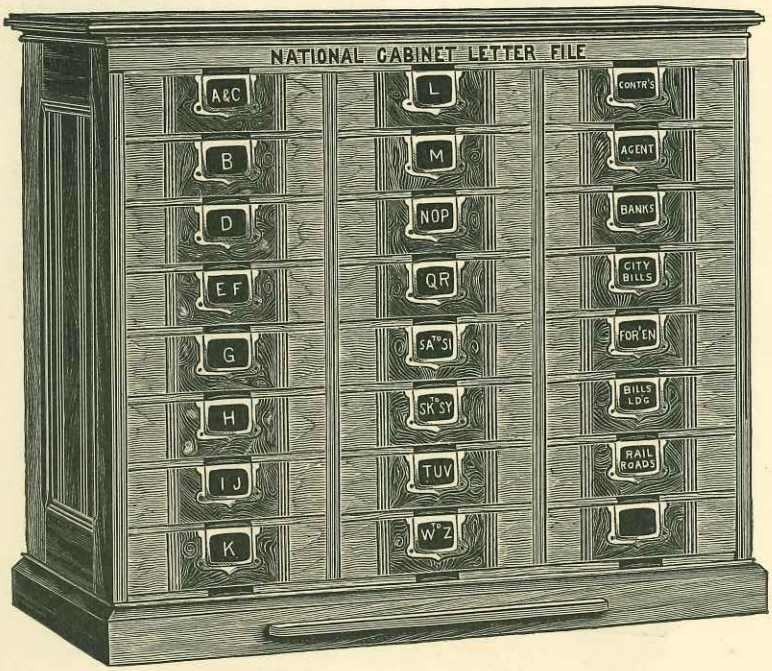
If desirable, this Cabinet can be made three files wide, by six high.

In the above cut we have left the cards on two of the Files blank. This is often done in ordering, and we think it a very good idea, as, after using for a time, it may occur to the purchaser that there are other matters for which he has made no provision, yet would like to file. He can then write the subject matter on these blank cards, or if he will send it to us, we will mail (free of charge) printed cards with which to replace the blank ones.

PRICE ON PAGE 33.

TWENTY-FOUR FILES.

SIX HUNDRED COMPARTMENTS.



HEIGHT, 3 FEET 4 INCHES; WIDTH, 3 FEET 7½ INCHES; DEPTH, 1 FOOT 1 INCH.

This is a very popular size, and is well adapted for a correspondence of about fifty letters per day. If desirable, the Cabinet can be made either two Files wide by twelve high, or four Files wide by six high.

In the above cut we have divided the alphabet into sixteen Files for letters, using the Abbreviation Index. The other eight Files could be Indexed as desired.

PRICE ON PAGE 33.

THIRTY FILES.

SEVEN HUNDRED AND FIFTY COMPARTMENTS.

HEIGHT, 4 FEET; WIDTH, 3 FEET 7½ INCHES; DEPTH, 1 FOOT 1 INCH.

The above plan is well adapted for the use of Banks; it can be elnarged or reduced to suit any amount of correspondence. The fist row of Files is worked by the Abbreviation system, while in the middle row we use the Double Index System. By this Double System the letter on the outside of the File is used to denote the first letter of the name of the city or town in which the corresponding Bank is located, and on the inside, having a complete Alphabetical Index, we file the communication by the first letter of the name of the Bank. Thus : a letter from the Union National Bank, Chicago, would go in File bearing the letters "C D," and on the inside would be filed on top of the page bearing the letter "U." The eight "Specials" would have the Semi-Monthly Index, while those for Cashier and President would each have an Alphabetical Index.

PRICE ON PAGE 33.

THIRTY-SIX FILES.

NINE HUNDRED COMPARTMENTS.

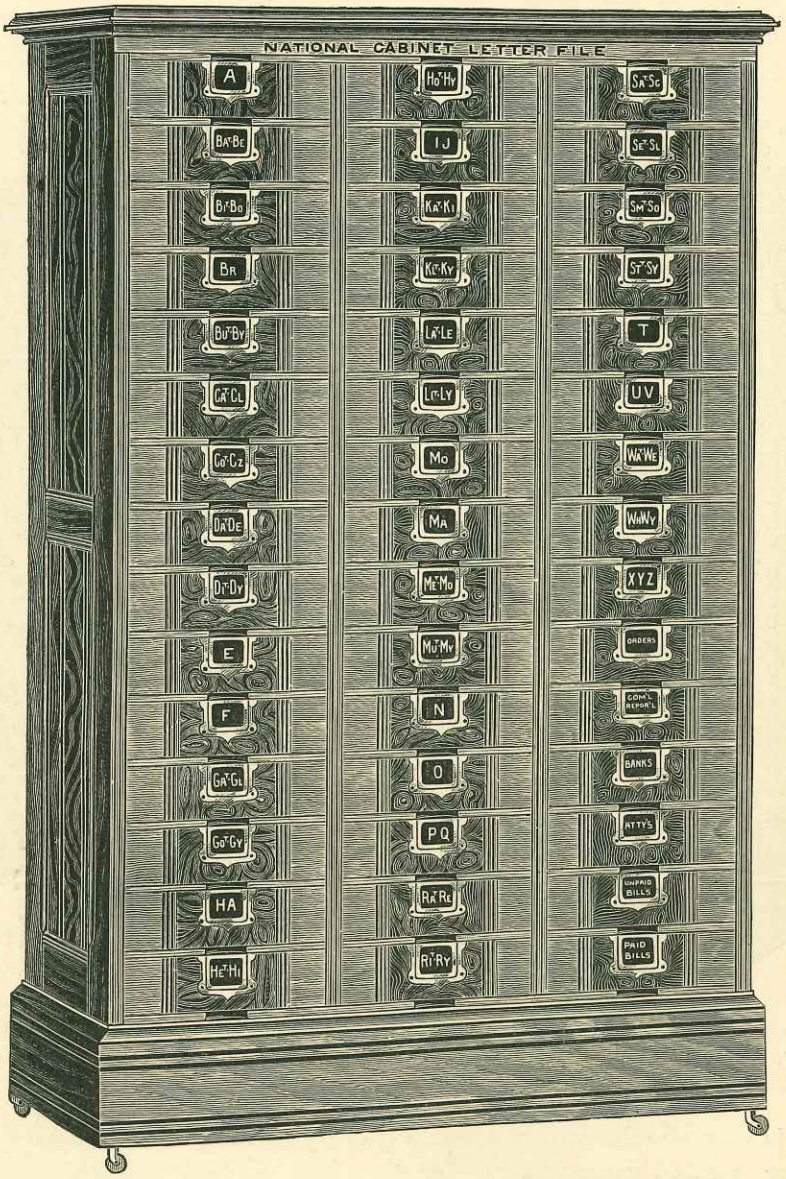
HEIGHT, 4 FEET 8 INCHES; WIDTH, 3 FEET 7½ INCHES; DEPTH, 1 FOOT 2 INCHES.

This size is very popular with wholesale grocery and hardware houses, the whole thirty-six Files being devoted exclusively to letters, when, for any reason, it may be desirable to have the "Special" Files in a separate Cabinet. In a system of this size, any name that is at all common will be found printed in full on some one of the tags of the Index.

PRICE ON PAGE 33.

FORTY-FIVE FILES.

ELEVEN HUNDRED AND TWENTY-FIVE COMPARTMENTS.



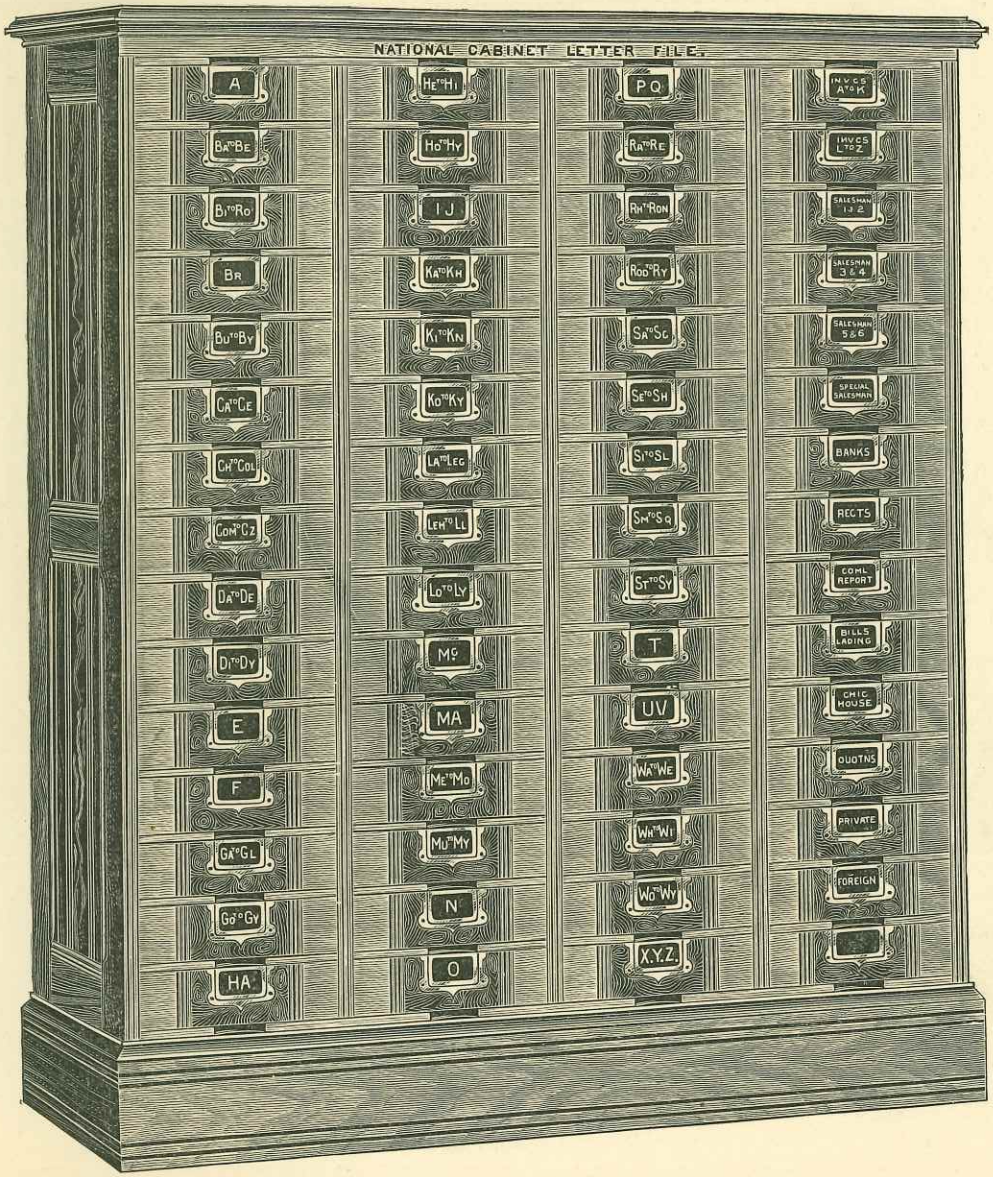
HEIGHT, 6 FEET 5 INCHES; WIDTH, 3 FEET 7½ INCHES; DEPTH, 1 FOOT 1 INCH.

This Cabinet is of very nice proportions and makes a beautiful piece of office furniture. The Cabinet is intended to set on the floor, the base being ten inches high. Add $1.50 to price for casters.

PRICE ON PAGE 33.

SIXTY FILES.

FIFTEEN HUNDRED COMPARTMENTS.



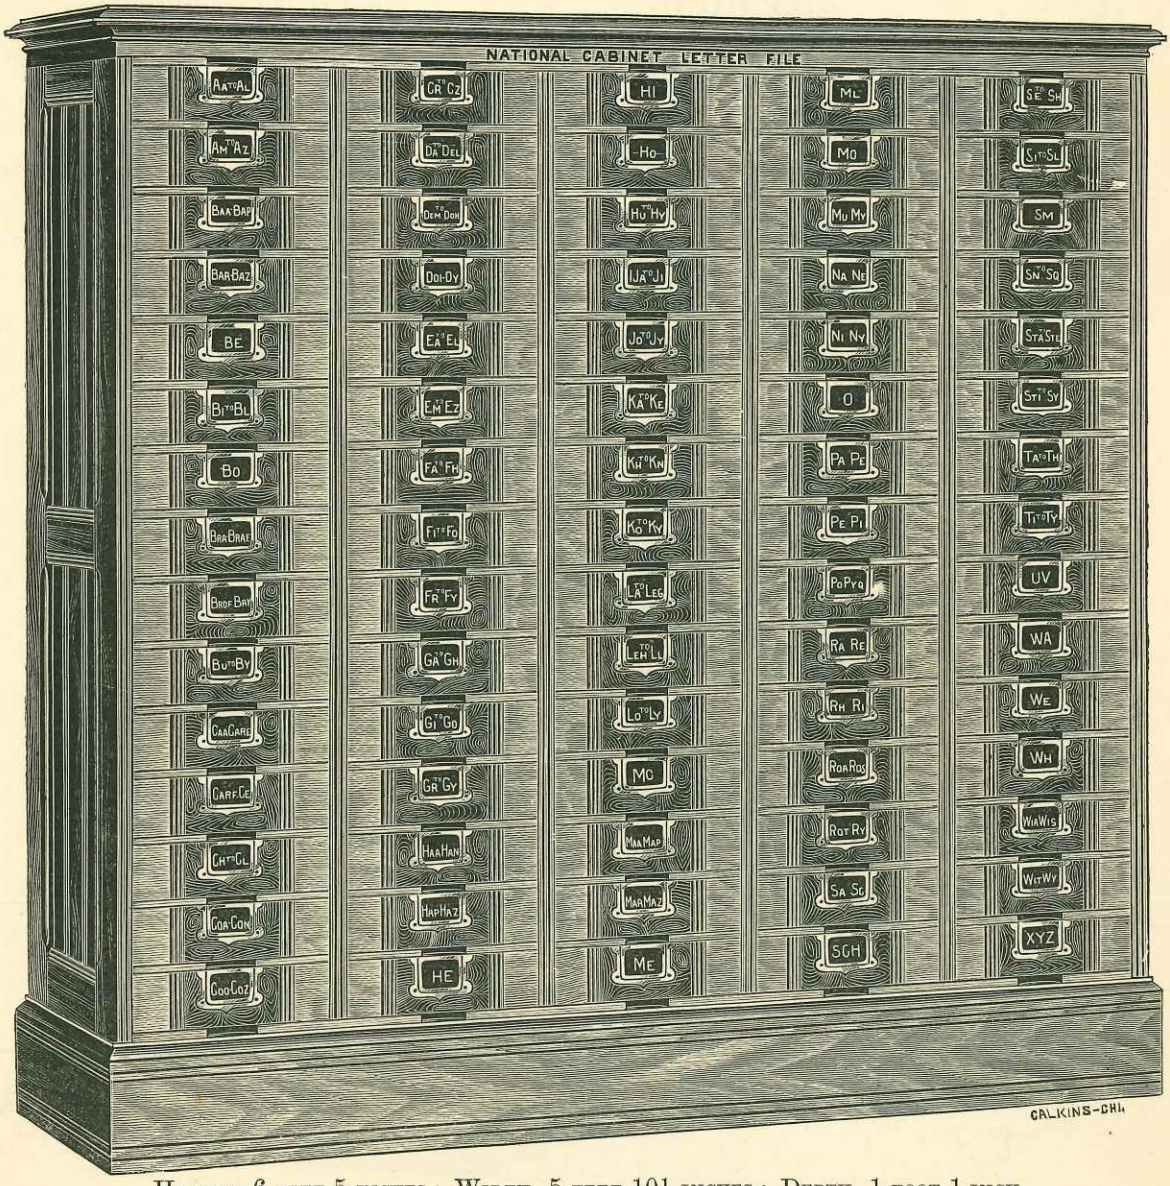
HEIGHT, 6 FEET 5 INCHES; WIDTH, 4 FEET 9 INCHES; DEPTH, 1 FOOT 1 INCH.

This Cabinet is well suited to a correspondence of 100 to 130 letters per day, and will hold about 45,000. The arrangement can be made to suit any business.

PRICE ON PAGE 33.

SEVENTY-FIVE FILES.

EIGHTEEN HUNDRED AND SEVENTY-FIVE COMPARTMENTS.



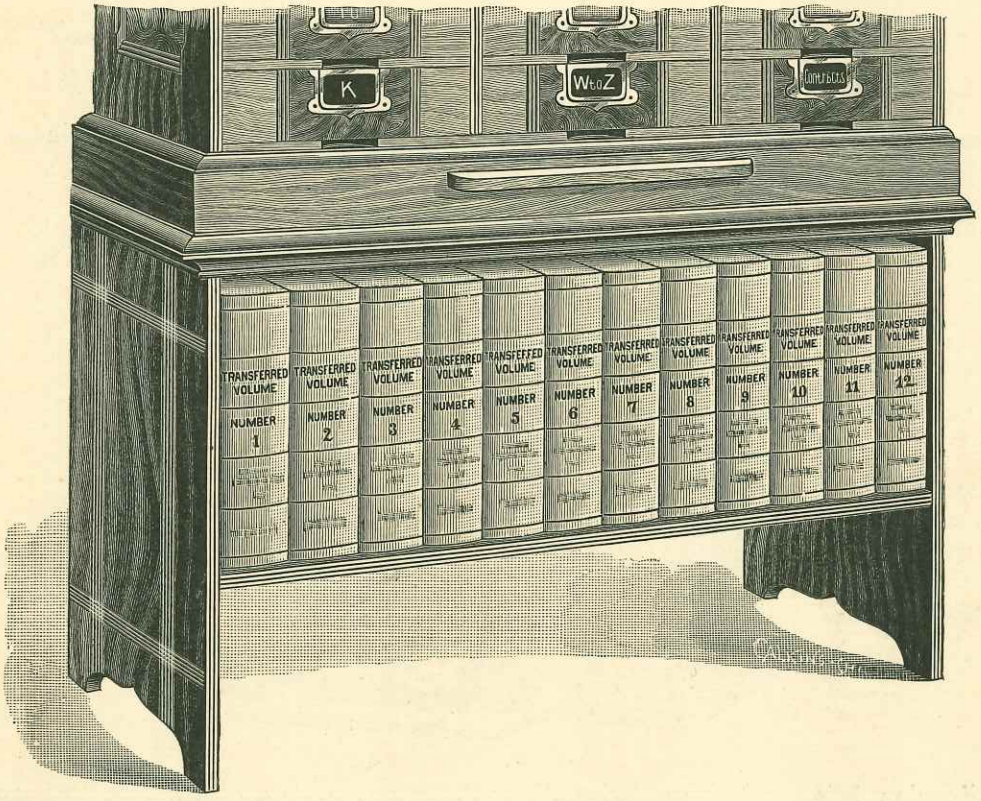
HEIGHT, 6 FEET 5 INCHES ; WIDTH, 5 FEET 10½ INCHES ; DEPTH, 1 FOOT 1 INCH.

In the above cut we show the Alphabet proportionately divided into seventy-five Files, and in each File are twenty-five subdivisions. Imagine 1875 pigeon-holes in your office, labeled proportionately with the business names of the country, and you have some idea of what this Cabinet is. We divide the Alphabet into any number of Files.

PRICE ON PAGE 33.

POPULAR BASE FOR

NATIONAL CABINETS.



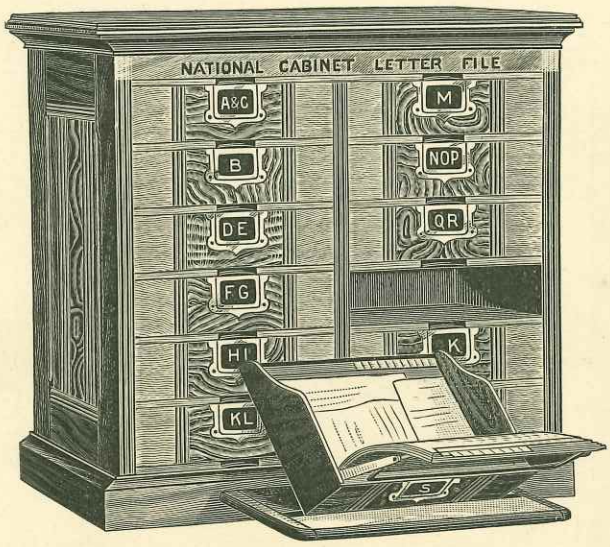
PRICES

Base for Cabinet,	two sections wide,	$4.00.
" " "	three " "	5.00.
" " "	four " "	6.00.

These bases are 28 inches high; made of solid black walnut and very nicely finished As shown in the cut, they can be used for storing Receiving Cases, or other articles common in a business office.

HOW TO USE THE CABINET.

Draw the slide from the base for a work table; draw the lower row of Files out as far as you can, the next row a little less, and so on to the top. Now sort and distribute the papers into the Files. The sorting done, take one File at a time and place it in position as shown in the cut and file the papers into their respective places between the index leaves.



This plan brings all papers twice before the eye of the operator before they are finally disposed of, and makes mistakes almost impossible. As, for example: if, in distributing, a letter from Marshall has been put into the "L" File, it could not be filed there, as the operator could find no abbreviation of Marshall's name on that file.

JOHN MORRIS COMPANY,

118 AND 120 MONROE STREET, CHICAGO.

21	62 00	69 00	**75**	200 00	215 00	**240**	620 00	680 00
24	70 00	77 00	**80**	215 00	235 00	**300**	780 00	840 00
27	77 00	84 00	**90**	240 00	260 00	**360**	940 00	1,000 00

We keep the above sizes in stock, so that we can ship them almost immediately on receipt of order. Cabinets larger than seventy-five files are furnished in two or more parts unless otherwise ordered. We are prepared to make odd shapes and sizes at very short notice.

At these prices the cabinets are labeled and indexed complete to suit the purchaser. A charge of 75 cents is made for lock on private or other files; Casters, $1.50.

EXTRA INDEXES, 30 CENTS. RECEIVING CASES, 35 CENTS.

DIMENSIONS.

A cabinet two files wide is 2 feet 6 inches wide; three files wide, 3 feet 7½ inches, and for each additional file 13½ inches. A cabinet three files high is 1 foot 9½ inches high, and for each additional file 4 inches higher, though certain of the larger sizes have seven inches extra on base, as is shown in cuts. Cabinets without doors are 13½ inches deep; with doors 14½ inches.

TESTIMONIALS.

"A wise man will profit by the experience of other men."

From thousands of commendatory letters received we have decided to publish only a few from well-known business houses who have discarded the most popular of other makes and purchased the National Cabinet Letter File.

American Pin Co., Waterbury, Conn.

The National pleases us very much better than the one we had before, and for which we exchanged with you. This is good. That was very poor.

AMERICAN PIN CO.

American Powder Mills, Chicago, Ill.

We are better satisfied with the National Cabinet than with any other we have used or seen.

AMERICAN POWDER MILLS.

Geo. D. Barnard & Co., St. Louis, Mo.

We have in use a Seventy-Five Drawer File National Cabinet, and we say it is the best letter file made. Could not keep house without it.

GEO. D. BARNARD & CO.

Badger Lumber Co., Kansas City, Mo.

We are using your National Cabinet Letter File, and are well pleased with it. We have no desire to change. We changed from the Globe file to yours, and prefer it.

BADGER LUMBER CO.

Belding Bros. & Co., Silk Manufacturers, Chicago.

We have in constant use one of your Sixty-Box Letter File Cabinets, and consider it the most convenient and desirable Cabinet in market. We have used other Letter Files, but consider yours the best.

BELDING BROS. & CO.

Joseph H. Brown, Wholesale Grocer, Ft. Worth, Tex.

It affords me pleasure to say that I prefer them to any other. The number I have bought of you (five) shows conclusively my opinion of them.

JOSEPH H. BROWN.

Belding Bros. & Co., Silk Manufacturers, New York.

We have had one of your Sixty-File Cabinets in use for some time, and find that it does all you claim for it. We are very much pleased with it, and could not now get along without one.

BELDING BROS. & CO.

Burnham, Hanna, Munger & Co., Wholesale Dry Goods, Kansas City, Mo.

Some time since we exchanged a cabinet we then had for one of your large National Cabinet Letter Files. The same has given satisfaction, and we have no hesitation in recommending the Cabinet to any one interested in finding the *right letter* at the *right time.*

BURNHAM, HANNA, MUNGER & CO.

Carter, Dinsmore & Co., Writing Fluids, Boston.

When we fitted up our new office we concluded that a larger cabinet of your manufacture would be an absolute necessity, and our later experience confirms the judgment we previously entertained.

CARTER, DINSMORE & CO.

Deere & Co., John Deere Moline Plow Works, Moline, Ill.

We have used a number of different makes of letter files, and some time since exchanged them all for one of your Seventy-Five Drawer National Letter Files. We find this file complete in every respect, and the most convenient letter file we have ever used, and this is the highest recommendation we could give it.

DEERE & CO.

Fairbanks, Morse & Co., Fairbanks Scales, Chicago.

The Cabinet purchased of you is giving excellent satisfaction. We consider it the best we have ever seen, and would cheerfully recommend it to all in want of a first-class Letter File.

FAIRBANKS, MORSE & CO.

First National Bank, Abilene, Kas.

I have used all the prominent Files, including the Amberg and Globe, but none have worked so smoothly as yours. In the matter of convenience in handling, it is in my estimation far in advance of any I have seen. I think every bank, especially, should have one of your Files.

THEO. MOSHER, *Cashier.*

First National Bank, Little Rock, Ark.

We have found your National Cabinet Letter File under the test of practical use so much more satisfactory than any other with which we have had experience that we do not anticipate the most inventive genius will be able to improve greatly thereon. We have gone to the expense of exchanging another that we considered good for yours, which we knew to be better, and are well satisfied with our action therein.

P. K ROOTS, *Cashier.*

Jno. P. Richardson, Wholesale Dry Goods and Notions, New Orleans, La.

After using for several years your National Cabinet Letter File, I do not hesitate to say that it is an invaluable piece of office furniture. Its compactness and the elasticity of arrangement, by which the boxes adapt themselves to the needs of any correspondence, are admirable features, while for ease of reference and convenience in handling I do not see how it could be improved.

JNO. P. RICHARDSON.

McConnell & Co., Manufacturers of Doors, Windows, etc., Hornellsville, N. Y.

We take pleasure in saying that your new National Cabinet Letter File gives perfect satisfaction. We are glad that we made the exchange.

MCCONNELL & CO.

R. Newbouer & Co., Wholesale Clothiers, Milwaukee, Wis.

It is one of the best arranged and sightly looking Cabinets we have seen. We formerly used the Amberg Letter File, and did not find it as practical as the National. We can cheerfully recommend it everywhere.

R. NEWBOUER & CO.

Pendleton Drug Co., Manufacturers and Jobbers, Nashville, Tenn.

We take pleasure in adding our testimony in favor of the convenience and system of the National Cabinet Letter File. We think it superior in these respects to all others we have seen, and thank you for bringing it to our attention.

PENDLETON DRUG CO.

Prewitt, Spurr & Co., Manufacturers of Woodenware and Lumber, Nashville, Tenn.

We take pleasure in expressing our hearty approval and appreciation of the many conveniences of the National Cabinet Letter File, and cheerfully commend it to any one needing what we conceive to be an indispensable piece of office furniture.

PREWITT, SPURR & CO.

Smalley Manufacturing Co., Manitowoc, Wis.

We believe it positively ahead in many respects of any file in the market to-day.

SMALLEY MANUFACTURING CO.

T. F. Indermill, Manufacturer and Jobber of Picture Frames and Artists' Materials, St. Joseph, Mo.

I have used your Letter Cabinet for several years, and am well pleased with it, finding it both convenient and simple in construction.

T. F. INDERMILL.

T. L. Wren, General Land Agent, Austin, Tex.

Your National Cabinet Letter File is superior to any other Letter File that I have ever seen or used. I have used it since 1884, and to me it is now indispensable.

T. L. WREN.

Weyerhaeuser & Denkmann, Manufacturers of Lumber, etc., Rock Island, Ill.

We have used your Letter File for some time, and have been very much pleased with the ease with which we could refer to correspondence, etc. It is the means of saving much labor.

WEYERHAEUSER & DENKMANN.

W. W. Cargill & Bro., Wholesale Grain, Seeds and Flour, La Crosse, Wis.

It is the best Letter File we have ever seen, and we have no hesitation whatever in recommending it to be, in our minds, the best manufactured.

W. W. CARGILL & BRO.

Wyckoff, Seamans & Benedict, Standard Remington Typewriter, Chicago, Ill.

We have to say that we have had experience with other files before purchasing yours a few months ago, and the use we have made of your file has demonstrated to us already that we did not make any mistake in our last investment. We are pleased to recommend it.

WYCKOFF, SEAMANS & BENEDICT.

Wyeth Hardware & Manufacturing Co., St. Joseph, Mo.

The double wire holds the correspondence more compactly than other Cabinets; we think this a great advantage to it.

WYETH HARDWARE & MANUFACTURING CO.

WHERE
NATIONAL CABINET LETTER FILES
CAN BE FOUND.

Heretofore it has been our custom to publish a list of firms using our Cabinets, but as that list has now become so large, it would, in itself, make a large volume, we are obliged to forego its publication, and will simply print a *partial* list of cities and towns where our Cabinets are in use. We shall be glad, at any time, to furnish references in any of the following places:

Aberdeen, Dak.
Abilene, Kan.
Abilene, Tex.
Adrian, Mich.
Ætna, Hickman Co., Tenn.
Alba, Mich.
Albion, Ind.
Akron, Ohio.
Albany, N. Y.
Albert Lea, Minn.
Albuquerque, N. M.
Allegheny City, Penn.
Allentown, Penn.
Amesbury, Mass.
Anoka, Minn.
Anthony, Kas.
Appleton, Wis.
Arcadia, Wis.
Argyle, Minn.
Ashland, Wis.
Astoria, Ore.
Arkansas City, Kas.
Armour, Dak.
Atlanta, Ga.
